

# CRAIG'S RECIPE CORNER

## Craig's Pork & Sauerkraut

Total time  
about 5 hrs

If you have any questions  
please email me at  
cweisman@comfort-pro.com.

### You'll need:

- |         |  |
|---------|--|
| 1       | Boston Butt Pork Shoulder<br>(divided into 3 pieces) |
| 2 Bags  | Silverfloss crispy sauerkraut                        |
| 1/2     | large sweet onion                                    |
|         | Salt   |
|         | Pepper   |
| 2 Tbsp  | olive oil  |
| 1/2 cup | apple cider or juice                                 |
| 1 cup   | Jack Daniels Winter Cider or apple cider             |
| 1/8 tsp | Ground Allspice                                      |
| 1/8 tsp | Ground Nutmeg  |
| 1/8 tsp | Ground Thyme   |
| 1/8 tsp | Ground Ginger  |
| 1/8 tsp | Ground Sage  |

### Set oven for 275° f

Heat large cast iron pan with olive oil (just about to smoke hot). Salt and pepper pork well and brown all sides in pan, remove and place pork in roasting pan. Add onions to cast iron pan and cook till clear then add the cider/Jack, and rest of spices. Stir all the flavor from the bottom of the pan and bring to boil for 5 min or until all alcohol is evaporated. Pour mixture over pork and bake for 2 hrs. Separate liquid from sauerkraut and reserve liquid for later. After 2 hrs add just kraut to pork and bake for 2 hrs. Before serving you can add some of the reserved kraut liquid to taste. I like it sour so I add about half liquid back.

# Comfort Pro CHRONICLES

FALL/WINTER 2021

## Benefits Of Lennox Air Purification Systems

Keeping small particles out of your home is essential for you and your family's health. Dust, allergens, and other particulates can make your home uncomfortable, unpleasant, and unhealthy. Having quality air filtration installed as part of your air conditioning or heating system can help reduce the number of particles in the air and improve your quality of life. Comfort Pro Heating & Air Conditioning recommends installing Lennox air purification systems to help improve your home's air quality.

### The Benefits Of Lennox Air Purification

Whether it's Summer or Winter, you can benefit from Lennox air purification. Lennox offers several designs, depending on your home's needs. For example, PureAir and PureAir S air purification systems feature hospital-grade filtration and can capture and remove particles smaller than the SARS-CoV-2 virus. The systems can also capture bacteria, fungal spores, pollen, dust, and smoke. Removing these unpleasant particulates not only helps keep illness at bay, but it can also help reduce allergens. Most importantly, the PureAir and PureAir S systems don't create ozone.

Lennox also offers the Healthy Climate Carbon Clean 16, which uses carbon-coated fibers alongside MERV 16 filtration. MERV stands for minimum efficiency reporting value, and it's the industry standard for determining the size of particles removed from the air. The higher the MERV number, the more particulates are removed. The Healthy Carbon Clean 16 removes dust, pollen, and mold, and with a MERV 16 filter, it can take care of smoke and viruses. In addition, the oxygen-treated carbon-coated fibers in the system help neutralize odors. The Healthy Carbon Clean also helps reduce ozone, which can irritate the lungs.

### Expert Air Purification Installation

For over 20 years, Comfort Pro Heating & Air Conditioning has provided Reading and the surrounding areas with friendly heating and AC service. We're a family-owned and operated company with a satisfaction guarantee and an A+ rating from the BBB. We're also a Lennox Premier Dealer that can maintain, repair, and install all major heating and cooling system brands. We offer 24/7 emergency repair service as well.

PROUD MEMBER OF

# MEET THE COMFORT PRO TEAM

“ I felt it would be a perfect  
step in my career path... ”

**Chris Keefer** has been a Heating and Air Conditioning Technician at Comfort Pro since 2004. Chris worked in the heating and air conditioning industry prior to joining Comfort Pro, and had known Doug and Craig Weisman for years. When the opportunity was presented to join the Comfort Pro team, “I felt it would be a perfect step in my career path,” said Chris. As a member of the team, Chris enjoys facing never-ending daily service challenges, meeting new people and working hand-in-hand with great coworkers.

Chris was born in Pusan, Korea, and adopted at 18-months old by a New York family with six children! He was raised in Long Island, New York, where he graduated high school and continued his education at a trade school.

“My greatest achievement has been raising a wonderful family and becoming a Papa to my grandson, Connor,” says Chris. He loves spending time with his wife, Rita, his children, 30-year-old Matthew and 25-year-old Christine, his six-year-old grandson and his many pets. The Spring is Chris’ favorite season because it’s when he gets to watch Connor play sports. In between Connor’s sporting events, Chris enjoys fishing, kayaking or watching a good horror movie or his favorite sports team, the Yankees.

For vacation, he and Rita enjoy the beach, especially taking morning walks on the sand. Even though they love fun in the sun, icebergs are on their bucket list, as they hope to travel on an Alaskan cruise in their future!

## WatchDog MAINTENANCE PLANS

# Year Round Comfort, GUARANTEED

We agree to provide **two Precision Inspections per year** to ensure a comfortable, energy efficient, and safer indoor environment.

### Why Should I have my Heating and Air Conditioning System inspected each year?

It is important that you make sure your systems are mechanically sound and that the safety controls are functioning properly. Your air conditioning system should have an Airflow and Refrigerant Diagnostic Performance Test to make sure it is achieving maximum performance levels. Your heating system should also have Carbon Monoxide Analysis and Temperature Rise Performance Tests done. These maintenance items are all performed during your WatchDog Maintenance Plan Precision Inspections.

### Does refrigerant need to be added to my system every year?

No. The refrigerant in your air conditioning system is circulated through the copper refrigeration lines to remove heat from your home. If your system ever needs refrigerant, you have a leak which means your system will not run at it’s highest efficiency level. It can also damage the compressor, the heart of your air conditioning system.

### Do you have Harmful Carbon Monoxide Levels in YOUR home?

Carbon Monoxide is responsible for an average of 430 unintentional deaths a year. During your WatchDog Fall Inspection, Comfort Pro will monitor the carbon monoxide levels in your heating system by performing a detailed analysis. We’re a family-owned and operated company with a satisfaction guarantee and an A+ rating from the BBB. We’re also a Lennox Premier Dealer that can maintain, repair, and install all major heating and cooling system brands. We offer 24/7 emergency repair service as well.

## WatchDog Advantages

### Free Travel/Diagnostic Fee (\$99.00 value)

Never pay a travel/diagnostic fee for heating and air conditioning repair service

### 10% Discount on Heating and Air Conditioning Repair Service

WatchDog holders receive the discount on all parts and labor

### 1% Discount on Installation & Equipment

WatchDog holders receive the discount on all parts and labor

### Two Precision Inspections Per Year

17 Point Precision Spring Inspection and a 25 Point Precision Fall Inspection

### Priority Status

WatchDog service calls are handled first!

### No Overtime Charges (Including Holidays)

New homeowners will retain remainder of agreement benefits

### Protection of Manufacturers Warranty

Manufacturers require regular maintenance to ensure original warranty

### Extends the life of your Investment

Extend the life of gas or oil heating and air conditioning systems

### Reduces Unexpected Repair Costs

When your equipment is maintained on a regular basis, minor adjustments will reduce major repairs

### Peace of Mind

Knowing your heating and air conditioning system is being properly maintained

### 100% Satisfaction Guarantee

We will gladly refund your service agreement fee if you are not totally satisfied

## Molly's Yard: 4 Ways to Keep Your Pooch Safe this Fall & Winter

Summer is ending and leaves are beginning to fall. Before we know it the holidays will be upon us! You and your four-legged best friend are ready to spend lots of time together as you start to celebrate cooler temps outdoors and the holidays indoors. Here are some ways to help keep them safe throughout the seasons!

### WATCH OUT FOR TICKS

A lot of ticks like to lurk around up until Winter, which means your pet is not safe in the Fall. Get rid of all things that they can latch on to, ex. leaves and garden litter. Always check your pets for ticks, and make sure to keep them on a tick control and repellent product.

### CHOCOLATE, CHOCOLATE, AND MORE CHOCOLATE

The start of Fall means the start of candy season. Halloween the biggest culprit when it comes to pets getting into candy and chocolate. Always be aware when walking your pet around the neighborhood that it doesn’t pick up any candy laying around on the streets.

### FEED YOUR PET RIGHT

As it is starts to get colder outside, start thinking about feeding your pet a little more than normal. More food will give their bodies the energy to stay warm. Always make sure to consult with your veterinarian before changing your pets diet.

### BE CAREFUL WITH DECORATIONS

Fall means holidays and holidays mean decorations!! Always watch where you are putting your decorations so that they are out of reach. Always make sure the pumpkins and gourds you bring home are out of reach as well. Eating strange objects can be very dangerous to your pet’s health.
