# WHAT IS COMPLETE SYSTEM ANALYSIS, YOU ASK?

The duct work that carries the air from the heat or cool source is the life blood of your comfort system. Just like the human body, your ductwork needs to be able to circulate enough air to its extremities like the blood carries oxygen to your brain and muscles. Without proper air pressure, like your heart with high blood pressure, it puts strain on the blower in your air handler or furnace.

In today's state of the art home heating and AC systems, proper airflow CFM (Cubic Feet Per Minute) is super critical. All SEER and efficiency ratings are based on having the required amount of CFM flowing through the equipment based on BTU's (British Thermal Unit). Simply changing the equipment is not a guarantee that you will be getting the savings from a higher efficiency unit. We must make sure your new system can breathe properly and perform at its best for years to come.

Our Comfort Advisors will complete a few tests to see how your duct system is performing and then prescribe a remedy if one shall be needed.

## THE FOLLOWING TESTS WILL BE COMPLETED:

- ☒ Analyze the particulate in your air inside the home
- ☒ Perform Industry Standard ACCA Manual J heat loss/gain calculation for proper sizing of equipment
- ☒ Measure positive pressure in supply duct and negative pressure in return duct
- ☒ Measure actual CFM output of duct system
-  Receive a script, from Comfort Pro, Inc., for an efficient and healthy home.

# MEET THE COMFORT PRO TEAM

“

Family and faith are his top priorities, and he cannot imagine life without them.

”

At Comfort Pro, Inc. we take pride in the talented individuals who form our team. In this issue of *Comfort Pro Chronicles*, we spotlight **Angel Salgado**, our Warehouse Shipping and Receiving Specialist. Angel joined the Comfort Pro Team on October 9, 2023, and has quickly become an important member of our warehouse team.

Before joining Comfort Pro, Inc. he worked as a Material Handler, where he developed warehouse skills and gained invaluable experience making him a true asset to our team. Since joining, Angel has excelled in his role, particularly in restocking and organizing our warehouse.

Born in San Juan, Puerto Rico, Angel later moved to Reading, where he attended Reading High School. Family is at the heart of Angel's life. He is a proud father to a one-year-old boy and two beautiful daughters, aged 11 and 13. His family and faith are his top priorities, and he cannot imagine life without them. His favorite holiday is Christmas, which he loves because of the joy and meaningful time it brings with his loved ones.

Angel has a variety of interests that help him unwind. In his free time, he enjoys working on and modifying cars, showcasing his attention to detail. He enjoys watching the Fast and the Furious movies, particularly the first one, and Tokyo Drift. His favorite TV shows include Martin, The Fresh Prince of Bel-Air, and Two and a Half Men. As a sports fan, Angel cheers for the Golden State Warriors in the NBA and the Philadelphia Eagles in the NFL. He loves traveling to Puerto Rico to revisit cherished childhood places. On his bucket list are thrilling activities like bungee jumping, skydiving, and scuba diving.

His favorite quote, "Good things come to those who wait," reflects his patient and hardworking nature. We are fortunate to have Angel as part of the Comfort Pro, Inc. family. His dedication, expertise, and positive attitude make him a valuable member of our team.

WELCOME TO THE TEAM

## Molly's Yard: Paws for Safety – Dog Tips for a Happy Halloween and Fall Season

As we embrace the crisp air and colorful foliage of fall, it's important to remember our furry friends and their safety during this festive season, especially as Halloween approaches. Here are some tips to ensure your dog's well-being during autumn and Halloween festivities:

**1. Costume Caution:** While dressing up our pets can be adorable, not all dogs enjoy wearing costumes. Ensure any costume is comfortable, doesn't restrict movement, and doesn't have small pieces that could be chewed or swallowed.

**2. Trick-or-Treat Safety:** On Halloween night, constant doorbell ringing and strangers in costumes can be stressful for dogs. Consider keeping your dog in a quiet room away from the commotion, with comforting toys or music to soothe them.

**3. Candy Awareness:** Chocolate and other candies can be toxic to dogs. Keep treats out of reach and ensure everyone in the household knows not to share sweets with four-legged friends.

**4. Decorative Dangers:** Pumpkins and cornstalks can add flair to your doorstep, but be mindful of your dog's curiosity. Lit candles inside pumpkins pose a fire hazard and decorations like fake cobwebs can be harmful if ingested.

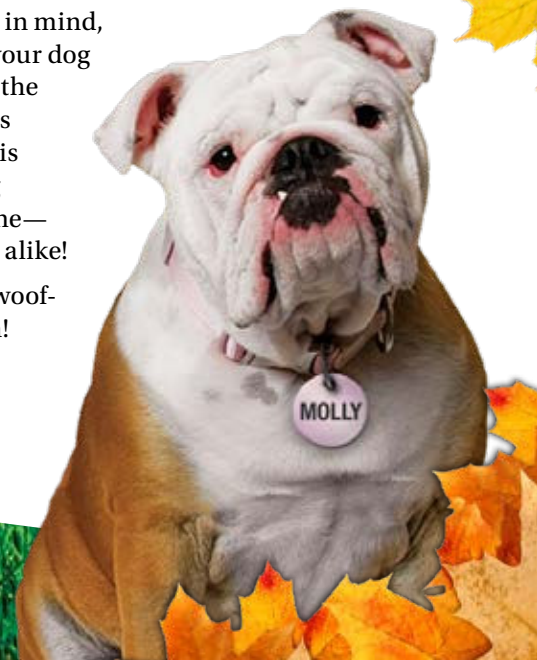

**5. Seasonal Changes:** As temperatures drop, be cautious of cold weather's impact on your dog. Some breeds may need sweaters or coats for outdoor walks, and check paws for ice balls and salt residue from sidewalks.

**6. Outdoor Adventures:** Fall hikes and leaf piles are inviting for dogs, but be aware of wildlife encounters and potential allergens like mushrooms. Always keep your dog on a leash unless in a safe, enclosed area.

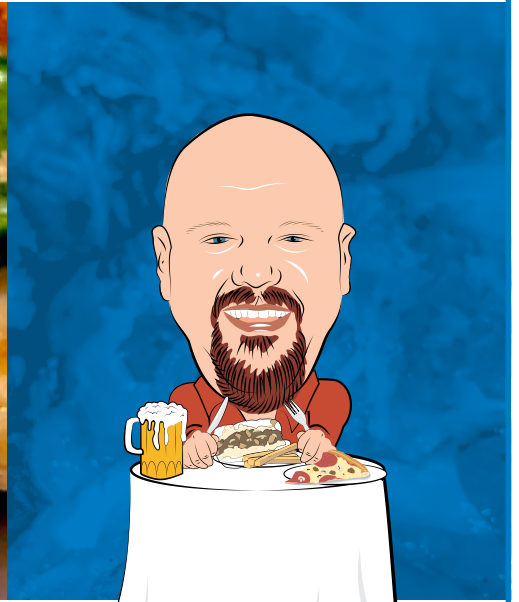

**7. ID and Microchipping:** With increased foot traffic during autumn events, ensure your dog wears a collar with an up-to-date ID tag. Microchipping provides an added layer of security should they become lost.

By keeping these tips in mind, you can ensure that your dog stays safe and enjoys the fall season as much as you do. Let's make this Halloween a howling good time for everyone—humans and canines alike!

Stay safe and have a woof-tastic autumn season!

# CRAIG'S RECIPE CORNER

## Craig's Baked Oysters

If you have any questions please email me at [cweisman@comfort-pro.com](mailto:cweisman@comfort-pro.com) or text me at 484-256-5734.

### You'll need:

- 12 large oysters
- $\frac{3}{4}$  stick of unsalted butter
- 2 cloves garlic grated on a micro plane
- $\frac{1}{2}$  cup julienned baby spinach
- 3 tsp Finely grated parmesan cheese.  
(Do not use shaker cheese)
- 1 12-hole muffin tin

Preheat oven to 425 Degrees F

### Prepare:

Melt butter and add garlic, sauté on low for 5 minutes then turn off, (do not brown), then set aside.

Shuck oysters and remove top shell, place bottom shell with oyster level in muffin tin holes, put 1 teaspoon of butter-garlic mixture in each oyster, put a pinch of spinach in each and  $\frac{1}{4}$  teaspoon of parmesan cheese on top of the spinach.

Put in oven and bake till cheese browns and juices are bubbling, let cool for few minutes and enjoy!
