

CRAIG'S RECIPE CORNER

Craig's Pork & Sauerkraut

Total time about 5 hrs

1	Boston Butt Pork Shoulder (divided into 3 pieces)	1/2 cup 1 cup	apple cider or juice Jack Daniels Winter Cider or apple cider
2 Bags	Silverfloss crispy sauerkraut	1/8 tsp	Ground Allspice
1/2	large sweet onion	1/8 tsp	Ground Nutmeg
	Salt	1/8 tsp	Ground Thyme
	Pepper	1/8 tsp	Ground Ginger
2 Tbsp	olive oil	1/8 tsp	Ground Sage

Set oven for 275° f

Heat large cast iron pan with olive oil (just about to smoke hot). Salt and pepper pork well and brown all sides in pan, remove and place pork in roasting pan. Add onions to cast iron pan and cook till clear then add the cider/Jack, and rest of spices. Stir all the flavor from the bottom of the pan and bring to boil for 5 min or until all alcohol is evaporated. Pour mixture over pork and bake for 2 hrs. Separate liquid from sauerkraut and reserve liquid for later. After 2 hrs add just kraut to pork and bake for 2 hrs. Before serving you can add some of the reserved kraut liquid to taste. I like it sour so I add about half liquid back.

Comfort Pro CHRONICLES

SPRING/SUMMER 2020

WE ARE HERE FOR YOU...

As we face unprecedented and challenging times, together in our communities and as a nation, Comfort Pro would like to remind our customers that we are here for you and we are **OPEN FOR BUSINESS** for all of your Heating and Air Conditioning needs 24 hours a day 7 days a week. Our main priority is to ensure your safety and the safety of our employees during the COVID-19 pandemic. In order to do so, Comfort Pro has implemented employee safety procedures. In addition, we are continually monitoring the latest information about COVID-19 and are adapting our procedures and processes.

From our Comfort Pro family to yours: stay safe, stay healthy and stay home!

Coronavirus Safety Procedures

put in place to protect our customers, employees and their families.

- 1 Our employees body temperatures are taken daily in the morning and are verified by a Comfort Pro, Inc. supervisor. If they have a fever the employee will be sent home until fever breaks, and they will need a Doctor's note to return to duties.
- 2 Employees are using social distancing, including no handshakes and maintaining 6ft. minimum between individuals.
- 3 Employees are using latex gloves before entering work places, and changing gloves on every new job.
- 4 Employees are washing hands and tools with hydrogen peroxide or hand sanitizer before entering next work place and when exiting.
- 5 Employees are wearing booties as they could help stop a virus from spreading.
- 6 All trash from sanitizing our employees hands and tools will be disposed in a special trash receptacle in their work truck, including paper towels, latex gloves, and booties.
- 7 Employees must wear a dust mask when removing filters, water panels, and any device that was in the air stream of the HVAC system. After wearing dust mask and removing these old materials they must be put in a separate plastic bag tied and sealed with duct tape and must be returned to the company dumpsters daily.
- 8 CDC says only use mask if you are sick. We at Comfort Pro are saying when removing anything in the air stream of HVAC systems.

MEET THE COMFORT PRO TEAM

Dave Moser is the warehouse manager at Comfort Pro, Inc. He was born and raised in Pottstown, Pennsylvania. After graduating from high school, Dave went on to further his education at Lock Haven University.

Like many people Dave's path after college was different than he had expected. He happened to get a job in warehousing right out of college. Although this was not something Dave went to school for, it was a job. It was not Dave's intention to spend his days working in warehouses but when he got his first job, he found that he really enjoyed it. He decided to stick with it and has been in warehousing for the past 25-30 years.

Dave has been with the Comfort Pro team for the past six years now. One of his favorite things about working for Comfort Pro is the people he works with. He loves the close-knit family-like environment from the people in the office. It makes coming to work everyday more enjoyable.

One of the best parts about Dave's job as a warehouse manager, is that everyday is a new challenge.

"Everyday that I come into work there is something different, something new to do and learn. It keeps me on my toes," Dave said.

Whether it is unloading a bulky order, getting supplies ready for a job, or reorganizing the warehouse there is always something new and exciting going on in the warehouse.

When Dave is not working you may find him at the bowling alley or spending time with his family. He also gets a thrill participating in a good tennis match whether it is table tennis or a match on the courts. Dave's all-time favorite sport, to watch and play, is tennis.

"Back in the day I loved John McEnroe," said Dave, "he was my favorite tennis player."

Dave had mentioned that throughout his time playing tennis his serve was very similar to John's.

An interesting fact that not many people know about Dave is that he is a collegiate champion. He won the Lock Haven ping pong championship in 1983.

This goes to show that he is not only an above average tennis player, but he can also school anybody in table tennis.

Although Dave is often taking part in activities outside of work, for him, there is nothing like sitting back and relaxing with his family watching a good movie on Netflix.

Dave's family includes his wife, two kids, and two cats. His one cat Boomer is twelve years old and some may say he is overweight, but Dave's family prefers to call him extra fluffy. Saffy, Dave's second cat, is 17 years old but she is young at heart. She is the noisy one of the two, her purr's and growls can be heard from anywhere.

"I swear our neighbors can hear her from outside of our house," said Dave.

One thing on Dave's bucket list is to retire and move down south. He enjoys the warmer weather and would like to spend his days soaking up the sun instead of shoveling snow. It comes with no surprise that summer is by far Dave's favorite time of the year.

A favorite quote of Dave's is from Greta Garbo.

"I never said I wanted to be alone, I only said I wanted to be left alone. There is all the difference."

“
Everyday that
I come into
work there
is something
different,
something new
to do and learn.
It keeps me on
my toes.”

Get a Flu Shot for Your Home

A flu shot for your home! Welcome to the new and improved way to purify your air. The HALO-LED by RGF Environmental is the industry's first whole home, in-duct LED air purification system. The HALO-LED is both mercury free and zero ozone compliant.

RGF has been creating advanced oxidation products for over 20 years. They have been using these Norovirus and MRSA protection products for some of the nation's largest hospitals, public schools, restaurant chains, hotel chains, theme parks, and cruise lines. These products have been tested and many studies have been performed by third party independent labs and universities.

Technologies:

- Unlimited cycling capability designed to turn on/off with the HVAC system.
- Automatic self-cleaning ionizers with carbon fiber brushes to reduce particulates. (patent pending).
- New REME-LED technology utilizing RGF's patented PHI and REME technologies providing superior indoor air purification.
- New hybrid hydrophilic catalyst incorporating industry's first washable ceramic catalyst.

Features:

- Seven-year limited warranty.
- Mercury and ozone free.
- Reduction of smoke, odors, VOCs, allergens, dust, and particulates.
- Reduces airborne and surface microbials, bacteria, viruses, and mold.
- Long Life replaceable LED cell model with 2.5 times longer life than current mercury vapor UV lamp technologies.
